jQuery CDN

jQuery detects this state of readiness for you. Code included inside `$(document).ready()` will only run once the page Document Object Model (DOM) is ready for JavaScript code to execute. Code included inside `$(window).on("load", function() { ... })` will run once the entire page (images or iframes), not just the DOM, is ready.

`$(document).ready()` | jQuery Learning Center

jQuery's event system requires that a DOM element allow attaching data via a property on the element, so that events can be tracked and delivered. The object, embed, and applet elements cannot attach data, and therefore cannot have jQuery events bound to them.

`.on()` | jQuery API Documentation
